

## Science Tutoring and more.....

The Science Resource Center (in PENN 211 and KEYS 140) provides an on-ground space where you can access anatomical models, microscopes, textbooks and tutoring all in one place. Our friendly, knowledgeable and welcoming tutors can help you understand course content and learn study skills to become a successful student in BIOS and CHEM.

- **The SRC has the same anatomical models that you use in Lab and will be tested on for practical exams. We also have textbooks, microscopes, whiteboards etc**
- **You can choose to work independently or with a tutor. If you prefer to work by yourself but have a question we're available to help.**
- **Students often join with classmates to study so the work is shared and easier to understand.**
- **You will benefit from networking with tutors and fellow students and will learn about volunteer, scholarship and employment opportunities. You will be surrounded by people who want you to succeed!**
- **No appointment is necessary, just walk-in during open hours.**
- **Ask a science tutor about our Virtual Science Resource site, featuring practice exams, videos etc.**

**Students can check walk-in schedules and create appointments on our website at**

<https://www.northampton.edu/student-services/learning-center.htm>

**Tutoring is also available in a wide variety of subjects, at other Learning Center locations, including:**

- Math, Physics, and Computer Science tutoring
- Science Tutoring (Biology, including A&P and Chemistry)
- Writing Tutoring to help students throughout the writing process
- ESL tutoring
- Tutoring in additional subjects such as accounting, Spanish, etc.
- **Academic coaching** is also available tailored to the student's specific goal including:
  - Time management
  - Goal setting and achievement
  - Study skills (textbook reading, note taking, organization, etc.)
  - Acclimation to college
  - Getting involved at NCC
  - Connecting with other helpful resources and services

**Tutoring and Coaching are available on campus and online:**

- In the Bethlehem Learning Center: College Center 315
- At the Bethlehem Science Resource Center: Penn 211
- In the Monroe Learning Center: Keystone 140 (Science Resource Room inside).
- At the Fowler Campus (select courses)
- Online through live, real-time video sessions
  - Students can upload files before their sessions and share their screens during online sessions
- Students can utilize our services at any LC site or online regardless of where or how they are taking their classes at NCC.
- Learning Center services are free and available to all students enrolled in credit courses at NCC.
- Tutoring is not only for students who are struggling in a course. All students can benefit from tutoring and our most successful students take advantage of the Learning Center.
